## 1. Context

The context of virtual workshops means that the design and preparation needs to be structured in a completely different way from face-to-face engagement.

We find that participants' engagement and focus online is excellent, but attention spans are shorter, so workshops need to account for this. Instead of designing a workshop across one or two days, you need to split up sessions across an extended period - sometimes across a few weeks or more depending on what you are trying to achieve.

## 2. Topics covered during workshop

Since motive behind for arranging this workshop is to address pedagogical implication of fundamental purpose following topics were discussed under these title

- Demonstrating how to used V.lab
- Remote Experiential Learning using Virtual Labs
- Research fellows will demonstrate Virtual Labs for different domain areas through the rest of the day.

## 3. Workshop

<b>Date</b>	: 14 Aug 2021
<b>Number of Participants</b>	: 216
<b>Venue</b>	: Zoom platform.

### Objective of workshop

- To provide remote-access to simulation-based Labs in various disciplines of Science and Engineering.
- To enthuse students to conduct experiments by arousing their curiosity. This would help them in learning basic and advanced concepts through remote experimentation.
- To provide a complete Learning Management System around the Virtual Labs where the students/ teachers can avail the various tools for learning, including

additional web-resources, video-lectures, animated demonstrations and self-evaluation.
